Market Barriers is designed to give the most accurate, up-to-date and impartial picture available of the status of online gambling across Europe - which jurisdictions are reforming their online gambling regulations, trends in regulation, experiences from jurisdictions which have opened their online markets and visibility on future developments, risks and likely trends.

Alongside key data and analysis on a jurisdiction by jurisdiction level, the study also includes exclusive coverage of hot topic areas: debates at the European level, taxation, advertising, payment processing, website blocking, blacklisting, social gaming and sports integrity, among other operational and regulatory issues.

Data analysis has also been provided on some jurisdictions courtesy of GamblingCompliance’s data team.

Coverage in this new edition has increased to include the following information points across more than 30 jurisdictions:

• Online Gambling Status
• Definition of Gambling
• Online Games Permitted
• Regulatory Authority
• Age Restriction
• Licensing and Costs
• Advertising
• Website Blocking
• Blacklist
• Payment Blocking
• Server Location
• International Liquidity
• Social Gaming
• Sports Integrity
• Cooperation
• Criminal Penalties
• Court of Justice of the European Union Ruling(s)

Cross-border issues and analysis on trends, barriers and other topics of concern are included on:

• Advertising
• Anti-Money Laundering
• Case Law
• European Enlargement
• European Developments
• International Liquidity
• Payment Blocking
• Social Gaming
• Sports Integrity
• Taxation
• Website Blocking

DIGITAL + UPDATES

There will be three quarterly updates to Market Barriers through to Summer 2014. Major developments occurring at EU and member state level will be tracked, as well as key “In Focus” topics researched and updated.
